

## GUEST LECTURE-“Blurred Lines”

### Keigo Kobayashi

Architect, Associate Professor at Waseda Univ. Dept. of Architecture, Co-Founder NoRA.

"In the time across the globe where drawing a line between things has been somewhat escalating in recent years, my personal experiences and kinds of researches / works I've been involved with are often about blurring of these lines or as results of blurred conditions. Through the lecture, I would like to talk about some examples of this in relation with Japan's post-growth society.
