

## **workshop by krvia students in collaboration with NACTO (National Association of City Transportation Officials).**

NACTO is a non-profit based in New York City, bringing together transportation departments from across North America for knowledge sharing, peer-to-peer mentoring, and providing guidance.

The project at Mith Chowky junction in Mumbai was part of the Global Designing Cities Initiative is a program under NACTO which is currently funded by the Bloomberg Philanthropies Initiative for Global Road Safety, which is a program working in 10 cities across Asia, Latin America, and Africa. Mumbai is the Indian city part of this program.

The project involved working with the MCGM and MTP in at the Mith chowki Intersection in Malad. On the 4th and 5th of June, in partnership with the city agencies we a temporary transformation was created at the intersection to demonstrate and trial various road safety design principles.
